WORK EXPERIENCE

Software Engineer | Python, React, ClickHouse, LangGraph **Dec 2025 - Present**
Visa Bellevue, WA

- Led development of a customer-facing AI analytics agent for Visa Acceptance Platform (VAP) converting natural language into ClickHouse queries over large-scale datasets, enabling transaction data insights and visualizations; achieved **92%** positive response feedback and generated a projected **$3K+** annual revenue per client in optional transaction fees.
- Designed and implemented a rule-based temporal parsing layer to deterministically extract dynamic date ranges, eliminating unnecessary LLM calls and reducing query latency by **~4 seconds**.
- Integrated a semantic retrieval system to surface high-relevance example queries for prompt grounding, improving LLM query generation accuracy by **70%+**.

Software Engineer III | Golang, Java Spring Boot, AWS, Kafka **Jan 2025 - Dec 2025**
USAA San Antonio, TX

- Ranked **#2 of 108** engineers in the fraud division for productivity; awarded Exceeds Expectations (2025).
- Built **15+** RESTful backend services to process **2K+** high-risk fraud alerts per day, decreasing fraud losses by **$3M+** per year and cutting the average investigator data aggregation time from **6 hours to 30 minutes**, saving an estimated **$2M** in annual investigator payroll.

ITS 2 Software Engineer | C#, Microsoft .NET Core, Azure **Aug 2024 - Jan 2025**
New York State Office of Information Technology Services Albany, NY

- Developed, deployed, and scaled a full-stack web application in the cloud that automated Child Protective Services case configuration fixes, reducing database fix wait times by **90%+** and saving taxpayers **$600K** in annual payroll.
- Replaced four COBOL batch jobs with modern, cloud-native batch applications, increasing code maintainability and eliminating **$40K+** in licensing costs annually.

Software Engineer Intern | Java Spring Boot, Snowflake **May 2024 - Aug 2024**
USAA San Antonio, TX

- Automated repetitive database maintenance tasks by building a configurable batch processing system, saving **~150** DBA hours per month and enabling future onboarding of new maintenance workflows.

EDUCATION

University at Albany **Aug 2021 - Dec 2024**
Bachelor of Science, Computer Science — **3.47/4.0** Albany, NY

PROJECTS

Cherry Mobile | *Article* | *GitHub* **React Native | TypeScript | Spring Boot | Expo | Git | REST API**

- Developed and launched a cross-platform mobile version of an existing web app with a redesigned UI and photo-based meal logging that utilizes the OpenAI Image API, increasing user retention by **30%**.

Cherry | *Article* | *GitHub* **Spring Boot | React.js | PostgreSQL | AWS | Git | REST API**

- Built and deployed a full-stack meal tracking web app leveraging the OpenAI API for natural language food recognition, reducing input times by **85%** compared to manual entry.

SKILLS

Languages: Java, Golang, C#, HTML/CSS, JavaScript, TypeScript, SQL, PL SQL
Technologies: AWS, Git, JIRA, Docker, REST & SOAP APIs, Agile/Scrum, Azure, DataDog, CI/CD
Frameworks: Terraform, Spring Boot, Microsoft .NET, JUnit, Mockito, React.js, React Native
